

Week Report 5

Completed Work for week 5

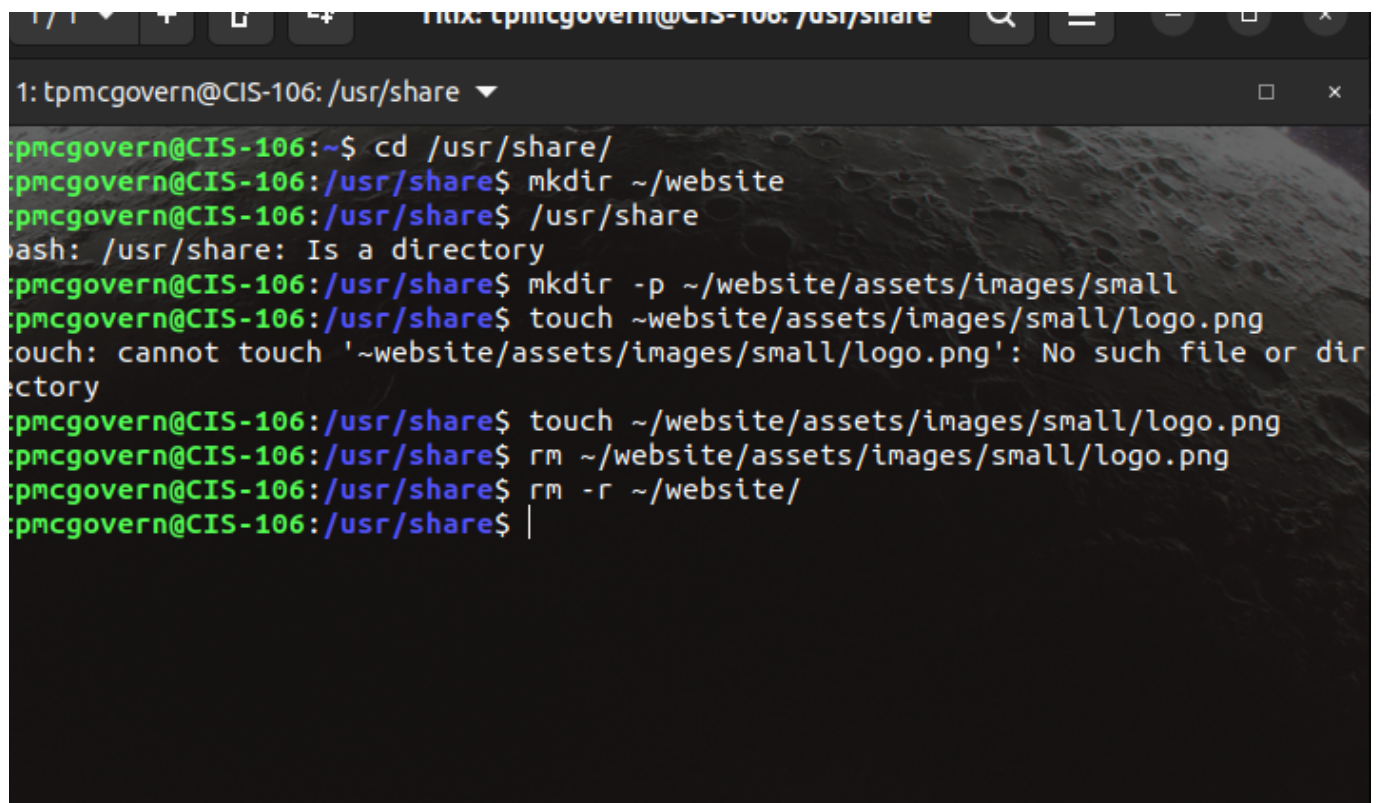

- [Lab 5](#)
- [Notes 3](#)

Practice 1

A terminal window titled 'Tilix: tpmcgovern@CIS-106: ~' showing a series of commands and their outputs. The user is in the directory ~/website. They create two subdirectories, 'scripts' and 'assets', and then use 'touch' to create 'index.html' in the current directory, 'image.png' in the 'assets' directory, and 'script.js' in the 'scripts' directory. A 'tree' command shows the resulting directory structure. Finally, they remove the 'scripts' and 'assets' directories and the 'website' directory itself using 'rm' and 'rmdir' commands.
